

## Curved Canopies

**Enhance the entrance to your home or business with this contemporary canopy.**

Only the best quality materials are used and all canopies are bespoke manufactured in the UK to create this stunning canopy. Anyone can do it cheaper, not everyone can do it better.

The newly designed curved canopy has a projection of up to 6000mm (6 metres) and is available in any length. This style of canopy also features structured poly-carbonate roof sheets which create a new, sleek look to any used area. The quality of the Pro Port Canopies curved canopy truly out-weighs cost.

The Pro Port Canopy roof system works as intended, ensuring full water drain off is achieved. Our product is designed to work better and proven to be stronger than others on the market, meaning that Pro Port Canopies Ltd is the only established carport manufacturer, supplier and installer to have a ZERO failure rate.

**Our curved canopies include the following design features:**

- The canopy can be manufactured in any RAL colour. Roof colour options are bronze, opal and clear.
- Our curved canopies can go to any length required and up to a projection of 6 metres.
