

Traditional Canopy

Maximum projection of 6m

Traditional carports are made to measure and manufactured with posts which require groundworks to support the structure.

All of our traditional style carports are cut to exact measurements on site which ensures a perfect fit to the area being covered.

Made from strong constructional grade aluminium and powder coated to British Standards for life span on all of our Traditional Carports. We ensure that whatever the foundations are (blocks, slabs, tarmac etc.) the posts are installed neatly and the ground is put back with minimal disruption.

Specialising in tapers & bespoke shapes, any area can be covered with a Pro Port Canopy.

Optional Structural Features:

- Tapers free of charge
- Side Sheeting
- Free-standing

Pro Port Canopies Ltd
Unit 4 - Arcadia Business Park,
Wheelhouse Rd,
Rugeley,
